Tool tracing calibration sheet

Print at 100% (Actual Size / no "fit to page").

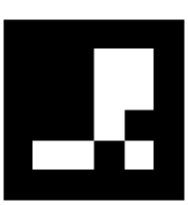

id 0

id 1

1. Lay ONE tool flat on the sheet. Bigger than the grid is fine.
2. Hold the camera level, straight above the sheet, with the flash on.
3. iPhone: Settings > Camera > Grid on, then line up the two crosshairs before shooting.
4. Keep all four corner markers uncovered and fully in the frame.

100.0 mm (measure after printing to confirm scale)

= 3.937 in
