Tool tracing calibration sheet

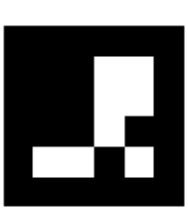

Print at 100% (Actual Size / no "fit to page").

1. Lay ONE tool flat on the sheet. Bigger than the grid is fine.
2. Hold the camera level, straight above the sheet, with the flash on.
3. iPhone: Settings > Camera > Grid on, then line up the two crosshairs before shooting.
4. Keep all four corner markers uncovered and fully in the frame.

100.0 mm (measure after printing to confirm scale)

= 3.937 in
